

JOHN MARK L. DINGLASAN

+63 961 167 8278 | johndinglasan12@gmail.com

EDUCATION

University of Batangas, Lipa Campus, Philippines
Bachelor of Science in Information Technology

Aug 2022 – Aug 2026

EXPERIENCE

Software Engineer Intern

Feb 2026 – Mar 2026

SMS Tyre Depot, Lipa, Philippines

- Contributed to an e-commerce web platform for the business, working with React.js on the frontend and MySQL for data storage.
- Supported cloud infrastructure and deployment using Docker and AWS, and assisted with PayMongo payment gateway integration.
- Worked on SEO and e-commerce SEO improvements to support online sales, with additional exposure to Tauri for desktop app development.

Freelance Developer — Student Clients / Thesis Projects

Sep 2025 – Present

Freelance Academic & Web Development, Remote

- Design and develop websites and web-based systems for student thesis and capstone projects.
- Create system documentation including SRS, ERD, DFD, and Use Case Diagrams.
- Assist students with requirement analysis, system flow design, and feature planning.
- Support code optimization, debugging, deployment, and final revisions for academic submission.

Full Stack Web Developer

Aug 2024 – Feb 2025

Edar CMT, Philippines

E-Commerce Website

- Designed and developed an end-to-end e-commerce platform, covering frontend UI, backend services, and database architecture.
- Implemented core features including product catalog, cart, checkout, user authentication, and order management.
- Integrated third-party services such as payment gateways, authentication providers, and notification systems.
- Created and maintained technical documentation including API contracts and system architecture.
- Deployed, monitored, and maintained the application in production environments.

IT Consultant

Nov 2023 – May 2024

Edar CMT, Calamba, Philippines

- Managed and maintained the business website and internal IT systems.
- Developed and updated digital tools such as e-commerce pages, booking forms, and inventory systems.
- Handled troubleshooting, system setup, data security/backups, and staff technical support.

PROJECTS

Instagram Business Email Scraper — Freelance Client Project

- Built a Python automation tool using ADB and UIAutomator to extract contact emails from Instagram business profiles, driving a real Instagram app on an Android emulator rather than relying on restricted API endpoints.
- Designed a multi-stage extraction pipeline (bio scan, Contact/Email button detection, popup parsing, logcat fallback for mailto intents) to maximize successful extraction rate.
- Packaged the tool as a self-contained Flask web app with a simple UI, plus one-click launchers for Windows and Mac, so a non-technical client could run it independently.

SKILLS & INTERESTS

Development: Java, JavaScript, Python, Node.js, React.js, Flask, Tauri

Automation: Web scraping, ADB / Android automation, UIAutomator, process automation tooling

Cloud Services: Digital Ocean, Amazon Web Services (AWS)

Continuous Integration: Gradle, NPM, Docker, Kubernetes, Git, GitLab Pipeline

Database: PostgreSQL, MySQL, MSSQL

Payments & SEO: PayMongo, Search Engine Optimization (SEO), E-commerce SEO

Operating Systems: CentOS, Windows, macOS

Certifications: The Web Developer Bootcamp 2025 (Udemy); CISCO Networking Basics (Cisco); IT Specialist: HTML, CSS, JavaScript (Certiport)
